

Contribution Journal - ITAI 2376 Project A02

Project: Hugging Face Transformers vs. OpenAI GPT-4 API | Course: ITAI 2376

Team: Elijah Raines (Team Leader), Brandon Matias, Justin Davis, Jonah Joseph, Osemudia Ogedengbe, Samantha Mireles

Brandon Matias

Role(s): Presentation Development & Practical Demo Implementation

Key Contributions

- Built and organized the PowerPoint presentation
- Chose the slide order and helped decide what information should go on each slide
- Worked on the sentiment-analysis demo/code (Hugging Face vs. OpenAI comparison)
- Added the practical example comparing Hugging Face and OpenAI approaches
- Helped connect the demo results to the presentation slides
- Checked that the slides were ready for class presentation

Contribution Evidence

Task	Description	File / Evidence
PowerPoint Organization	Slide structure and ordering	A02a_DataProxy_ElijahRaines_ITA2376.pptx
Sentiment Analysis Demo	Code implementation for both platforms	demo/huggingface_vs_openai_demo.ipynb
Demo Integration	Connected demo results to presentation	A02a_DataProxy_ElijahRaines_ITA2376.pptx

Elijah Raines

Role(s): Report Organization & Project Submission Management

Key Contributions

- Revised and organized the written report
- Shortened the report so it matched the professor's one-page requirement
- Worked on the main Hugging Face vs. OpenAI comparison section
- Helped decide which comparison categories should stay in the final report
- Organized the GitHub repository layout and required submission files
- Checked the required file naming format (A02a/A02b, course code, team name, submitter)
- Helped prepare the final report for submission
- Reviewed the project requirements to make sure nothing required was missing

Contribution Evidence

Task	Description	File / Evidence
Report Revision	Shortened report and converted it into technical-report format	A02b_DataProxy_ElijahRaines_ITA2376.pdf
Comparison Section	Main feature analysis and formatting	A02b_DataProxy_ElijahRaines_ITA2376.pdf
Repository Organization	GitHub structure and file layout	README.md / folder structure
File Naming	Verified professor's format requirements	All submitted files

Contribution Journal - ITAI 2376 Project A02

Project: Hugging Face Transformers vs. OpenAI GPT-4 API | Course: ITAI 2376

Team: Elijah Raines (Team Leader), Brandon Matias, Justin Davis, Jonah Joseph, Osemudia Ogedengbe, Samantha Mireles

Justin Davis

Role(s): Research & Report Verification

Key Contributions

- Gathered research material for the report
- Helped locate sources about Hugging Face and OpenAI
- Checked the report information against the research materials
- Reviewed the real-world application examples (JPMorgan Chase and Duolingo)
- Helped make sure the examples used in the report matched the topic
- Helped prepare the final written report for accuracy
- Read through the final version and pointed out information that needed clarification

Contribution Evidence

Task	Description	File / Evidence
Research Gathering	Located sources for Hugging Face and OpenAI	references/sources.md
Information Verification	Checked report facts against research	A02b_DataProxy_ElijahRaines_ITA2376.pdf
Real-World Examples	Verified JPMorgan Chase and Duolingo examples	A02b_DataProxy_ElijahRaines_ITA2376.pdf
Clarity Review	Identified sections needing clarification	Report revision notes

Jonah Joseph

Role(s): Presentation Editing & Quality Review

Key Contributions

- Edited the wording on the presentation slides
- Shortened slide text so it was easier to present
- Reviewed the head-to-head comparison on the slides
- Checked that the Hugging Face and OpenAI differences were explained clearly
- Helped make the slide formatting and wording consistent
- Compared the slides with the report to make sure they matched
- Helped clean up the final presentation before submission

Contribution Evidence

Task	Description	File / Evidence
Slide Text Editing	Shortened and simplified slide wording	A02a_DataProxy_ElijahRaines_ITA2376.pptx
Comparison Review	Verified Hugging Face vs. OpenAI clarity	A02a_DataProxy_ElijahRaines_ITA2376.pptx
Formatting & Consistency	Made slide formatting uniform	A02a_DataProxy_ElijahRaines_ITA2376.pptx
Report-Slide Alignment	Checked that slides matched report content	Presentation + report

Contribution Journal - ITAI 2376 Project A02

Project: Hugging Face Transformers vs. OpenAI GPT-4 API | Course: ITAI 2376

Team: Elijah Raines (Team Leader), Brandon Matias, Justin Davis, Jonah Joseph, Osemudia Ogedengbe, Samantha Mireles

Osemudia Ogedengbe

Role(s): Team Coordination & Project Review

Key Contributions

- Joined the DataProxy project after confusion about the official team roster
- Coordinated with the team so she could be included in the correct A02 project
- Reviewed the current project materials and submission structure
- Helped confirm team participation before final submission

Contribution Evidence

Task	Description	File / Evidence
Team Coordination	Joined the existing DataProxy project and coordinated with the team	Team communication
Project Review	Reviewed the current A02 materials and deliverables	A02 project repository
Submission Coordination	Helped confirm team participation before submission	Team communication

Samantha Mireles

Role(s): Roster Clarification & Independent Submission Coordination

Key Contributions

- Reviewed the A02 assignment requirements while there was confusion about the team roster
- Communicated about whether the assignment should be submitted solo or with the DataProxy team
- Helped identify the need to update the final team list before submission
- Reviewed the final project location so the team could avoid conflicting submissions
- Helped clarify which materials should be connected to the official team repository

Contribution Evidence

Task	Description	File / Evidence
Roster Clarification	Helped clarify team membership before final submission	Team communication / Eagle Online roster
Submission Coordination	Communicated about solo vs. team submission status	Team communication
Repository Review	Reviewed the DataProxy A02 project location and deliverables	A02 project repository

Project Milestones

- Research phase completed
- Report first draft finished
- Report reviewed and revised
- Presentation slides prepared
- Demo code written and tested
- All sources verified
- Final report submitted
- Presentation delivered

Notes

- All contributions are verified by the contributor
- Use this journal to track individual work and ensure fair distribution of tasks
- Update regularly as work progresses
- Include links or file references for all major work items
