

Contribution Journal - ITAI 2376 Project A02

Hugging Face Transformers vs. OpenAI GPT-4 API

Course	ITAI 2376
Team Members	Brandon Matias, Elijah Raines, Justin Davis, Jonah Joseph

Team Member Contributions

Brandon Matias

Role(s): Presentation Development & Practical Demo Implementation

Key Contributions

- Built and organized the PowerPoint presentation
- Chose the slide order and helped decide what information should go on each slide
- Worked on the sentiment-analysis demo/code (Hugging Face vs. OpenAI comparison)
- Added the practical example comparing Hugging Face and OpenAI approaches
- Helped connect the demo results to the presentation slides
- Checked that the slides were ready for class presentation

Contribution Evidence

Date	Task	Description	File / Evidence
—	PowerPoint Organization	Slide structure and ordering	A02a_DataProxy_ElijahRaines_ITA2376.pptx
—	Sentiment Analysis Demo	Code implementation for both platforms	demo/huggingface_vs_openai_demo.ipynb
—	Demo Integration	Connected demo results to presentation	A02a_DataProxy_ElijahRaines_ITA2376.pptx

Elijah Raines

Role(s): Report Organization & Project Submission Management

Key Contributions

- Revised and organized the written report
- Helped shorten the report so it matched the professor's one-page requirement
- Worked on the main Hugging Face vs. OpenAI comparison section
- Helped decide which comparison categories should stay in the final report
- Organized the GitHub repository layout and required submission files
- Checked the required file naming format (A02a/A02b, course code, team name, submitter)
- Helped prepare the final report for submission
- Reviewed the project requirements to make sure nothing required was missing

Contribution Evidence

Date	Task	Description	File / Evidence
—	Report Revision	Shortened report from about 1,100 to about 550 words	A02b_DataProxy_ElijahRaines_ITA2376.pdf
—	Comparison Section	Main feature analysis and formatting	A02b_DataProxy_ElijahRaines_ITA2376.pdf
—	Repository Organization	GitHub structure and file layout	README.md / folder structure
—	File Naming	Verified professor's format requirements	All submitted files

Justin Davis

Role(s): Research & Report Verification

Key Contributions

- Gathered research material for the report
- Helped locate sources about Hugging Face and OpenAI
- Checked the report information against the research materials
- Reviewed the real-world application examples (JPMorgan Chase and Duolingo)
- Helped make sure the examples used in the report matched the topic
- Helped prepare the final written report for accuracy
- Read through the final version and pointed out information that needed clarification

Contribution Evidence

Date	Task	Description	File / Evidence
—	Research Gathering	Located sources for Hugging Face and OpenAI	references/sources.md
—	Information Verification	Checked report facts against research	A02b_DataProxy_ElijahRaines_ITA2376.pdf
—	Real-World Examples	Verified JPMorgan Chase and Duolingo examples	A02b_DataProxy_ElijahRaines_ITA2376.pdf
—	Clarity Review	Identified sections needing clarification	Report revision notes

Jonah Joseph

Role(s): Presentation Editing & Quality Review

Key Contributions

- Edited the wording on the presentation slides
- Shortened slide text so it was easier to present
- Reviewed the head-to-head comparison on the slides
- Checked that the Hugging Face and OpenAI differences were explained clearly
- Helped make the slide formatting and wording consistent
- Compared the slides with the report to make sure they matched
- Helped clean up the final presentation before submission

Contribution Evidence

Date	Task	Description	File / Evidence
—	Slide Text Editing	Shortened and simplified slide wording	A02a_DataProxy_ElijahRaines_ITA2376.pptx
—	Comparison Review	Verified Hugging Face vs. OpenAI clarity	A02a_DataProxy_ElijahRaines_ITA2376.pptx
—	Formatting & Consistency	Made slide formatting uniform	A02a_DataProxy_ElijahRaines_ITA2376.pptx
—	Report-Slide Alignment	Checked that slides matched report content	Presentation + report

Project Milestones

- Research phase completed
- Report first draft finished
- Report reviewed and revised
- Presentation slides prepared
- Demo code written and tested
- All sources verified
- Final report submitted
- Presentation delivered

Notes

- All contributions are verified by the contributor.
- Use this journal to track individual work and ensure fair distribution of tasks.
- Update regularly as work progresses.
- Include links or file references for all major work items.
